EDUCATION

Computer Engineering

Selçuk University

2023 –

Bahattin Yildiz Anatolian High School

Istanbul

2017 – 2021

SKILLS

- **Technical Skills:** Upper-Intermediate: C++, C#, SQL Server, ADO.NET, Excel; Advanced: Git, GitHub
- **Yabancı Diller:** Turkish (Native), English (Speaking: C1, Writing: B2), Arabic (Speaking: C1, Writing: C1)

PUBLICATIONS

- [YouTube – Solid Code](#)
Explain implementation processes of my software projects in English.
- [GitHub](#)

INTERESTS

- Table Tennis (Advanced)
CS Ping Pong Club | Founder
- language learning -
Selçuk University Translation club |
Member

VOLUNTEERING

UEC European Track Cycling Championships

- Served as an English interpreter between athletes and the organizing team from February 1 to 5, 2026

PROFESSIONAL DEVELOPMENT

Pergel Fellowship 2025

Konya Career Support Center - (10/2025 –)

- Enhancing my 21st-century competencies—including teamwork, communication, and leadership—through applied training programs, while gaining real-world experience through field visits and experience-sharing sessions

MZV–MEF YetGen 21st Century Awareness Program

Yetkin Gençler - (07/2025 – 10/2025)

- Played a pivotal role in shaping my personal and professional development.
- Strengthened my 21st-century competencies and, recognizing their importance, went on to pursue further development programs, including the Pergel Fellowship.

Database Level 1 - SQL (Concepts and Practice)

programmingadvices.com - (06/2025 –)

- Gained practical experience in database design, table creation, and CRUD operations using SQL Server.

Goal Setting: Crafting and Achieving Your Objectives

managementdose.com - (04/2025 –)

- Learned to align my daily actions with long-term goals through intentional planning and structured goal-setting practices.
- Recognized the direct impact of key life domains—such as health, hobbies, and relationships—on goal achievement, adopting a more holistic and integrated approach to personal performance.

Level 2: Backend with C#

programmingadvices.com - (02/2025 – 04/2025)

- Implemented 6 projects as part of the course, focusing on effectively linking UI controls with application code.

Level 1: Fundamentals with C++

programmingadvices.com - (12/2023 – 02/2025)

- Completed a 158-hour intensive training program covering functional programming, object-oriented programming (OOP), and data structures in C++.
- Solved 700+ programming problems and developed 7 comprehensive projects.

PROJECTS

Driver License Management System [🔗](#)

C#, SQL Server, ADO.NET, 3-Tier Architecture - (02/2026 –)

- Designing and developing the system by integrating my knowledge of C#, SQL Server, ADO.NET, and 3-Tier Architecture into a comprehensive, real-world application
- Focused extensively on database design, building a structured and scalable relational schema to support system functionality

Contact Management Application (3-Tier Architecture) [🔗](#)

C#, SQL Server, ADO.NET, 3-Tier Architecture - (01/2026 – 02/2026)

- Developed the application based on a structured 3-Tier Architecture (Data Access, Business Logic, Presentation)
- Established clear separation and controlled interaction between layers to ensure maintainability, scalability, and a sustainable architectural design.

Bank Management System [🔗](#)

C++, OOP - (04/2024 – 07/2024)

- Developed a role-based banking system where administrators manage user creation, deletion, updates, and role assignments, while users perform core banking operations such as deposits, withdrawals, and password updates
- Architected a maintainable structure by organizing 150+ functions into 30 distinct classes
- Implemented role authorization using bitwise operators to define and control administrative permission levels
- Applied OOP principles, including Inheritance and Polymorphism, to enhance system security, scalability, and maintainability
